ABOUT ME

Software developer with experience in back-end and full-stack development, working on large-scale corporate projects. I learn new technologies quickly, excel at solving complex problems, and transform user needs into efficient solutions. I am driven by continuous learning and challenges that require technical precision, best practices, and well-structured architecture. I focus on delivering clean, scalable, and high-performance code.

PROFESSIONAL EXPERIENCE

Software Developer — CPQD (Jan 2022 – Apr 2024)

- Developed solutions using Java, Spring Boot, and PostgreSQL.
- Implemented REST APIs and high-performance services.
- Collaborated with DevOps, Database, and Architecture teams.
- Participated in projects involving IoT, Python, Node.js, React, and SPA applications.

Software Developer — TRE-SC (Apr 2017 – Jan 2022)

- Back-end development for the EAP platform.
- Maintenance and evolution of systems in Java JSE/JEE.
- Development of WebServices using SOA architecture.
- UI development using JSF, CDI, RichFaces, and jQuery.
- Experience with JBPM, JReport, Maven, SVN, CVS, and JBoss EAP.

EDUCATION

UNISUL — Internet Systems Development - completed (2020)

Anhanguera Educacional - Postgraduate Java Applied Engineering - expected completion: Janeiro/2027
